In September 2021, as part of the 3rd National Patient Safety and Healthcare Quality Conference 2021, the Ministry of Health, Ghana and Ghana Health Service hosted a National Learning Forum to discuss progress and share examples and experiences of implementing Quality Care for Maternal, Newborn and Child Health.

This webinar will document and share the challenges, practical solutions and lessons learned by Ghana in implementing and scaling up quality of care for MNH. This session will provide an opportunity for exchange between policy makers, managers and providers at national level, as well as among Network countries and with broader partners.

Speakers:

- Dr Ernest Asiedu, Head of Quality Management Unit, Ministry of Health Ghana
- Dr Mary Ashinyo, Deputy Director, Quality and Safety Management Institutional Care Division, Ghana Health Service

Facilitator:

- Dr Roseline Doe, Maternal and Child Health Officer, World Health Organization, Ghana

This is the second webinar in the "Network National Forums" series, hosted by the Network for Improving Quality of Care for Maternal, Newborn and Child Health, with the support of the World Health Organization.
