## NEW FEATURES OF THE SECOND EDITION OF ENCC:

-  Focuses on the foundation for the essential care of every newborn and rights of newborns, nurturing care, and strengthened links to care in the community.
-  Integrates existing newborn courses from around the world such as WHO Early Essential Newborn Care coaching, as well as Helping Babies Breathe and Helping Babies Survive.
-  Bases on competencies and is flexible to be used for both in-service and pre-service education, different course options.
-  Educational methodologies incorporate active learning and structured simulations.
-  Encourages collection, analysis and use of data in quality improvement activities focused on essential newborn care.
-  Is part of a set of resources for improving the care of newborns, such as WHO Human Resource Strategies for improving newborn care health facilities and WHO Standards.
